Eaton IT Racks

Reliable protection for critical IT equipment

Our range of IT racks have been designed to offer the ultimate in performance, ease of use and energy cost savings. Superior airflow management will keep IT equipment working longer and more reliably, while a full range of cable management and storage accessories help to keep your racks neat and well-organised.

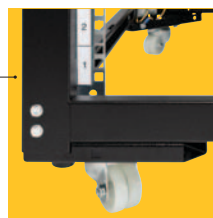

The New RE Series IT Racks

Solid protection for critical IT equipment in network closet and small server room applications.

- Full access with quick-release, reversible doors
- Quick side access with easy-to-remove, lockable side panels
- Prolong IT equipment life with 80% door perforation
- Protect equipment from debris and reduce sound level with glass door option
- Flexible, modular top allows for fans or cable-entry brushes

- Easy positioning of IT equipment with factory-installed U-markings

- Fast IT equipment installation with tool-less, step-less 19" adjustable rails, reducing set-up and refresh time
- Solid protection of IT equipment with rigid self-squaring bolted frame
- Move rack easily into place with factory installed casters
- Stabilise rack with pre-installed levelling feet

- Safety first with grounding kit as standard
- Space-saving sizes for tight space constraints; 27U, 800mm deep

Intelligent Power Pod Your Business Live 365

Eaton racks are a part of Intelligent Power Pod™, an integrated power management system for converged and hyper-converged infrastructure solutions.

The system incorporates power backup, power distribution, power management, housing and support services.

It includes full integration with hypervisors to automate the migration of virtualised equipment and provide the business continuity and resilience you need.

Your converged solution is protected, managed, intelligent and works non-stop.

RP Series IT Racks

High performance IT rack series for the most demanding applications.

- Smart, high quality design and construction
- Prolong IT equipment life with airtight, high airflow design
- Full, flexible access with quick-release, field-reversible doors
- Convenient push-close doors, key lock to secure
- Stabilise rack with pre-installed levelling feet
- Safety-assured with preinstalled grounding system, eliminating expensive field installation
- Unlimited cable access with large rack-top and bottom openings
- Quick side access with easy-to-remove, lockable side panels
- Fast IT equipment installation with tool-less, step-less 19" adjustable rails, reducing set-up and refresh time
- Maximise floor space with space-saving split rear doors
- Move rack easily into place with factory-installed casters
- Convenient starter kit for fast, hassle-free start-up

RE / RP Series Overview

	RE Series	RP Series
Applications	Network closets to Server rooms. <i>When affordable, solid performance needed.</i>	Server rooms to large data centers. <i>When high performance is demanded.</i>
Height	27U, 42U	42U, 48U (51U*)
Depth	Ideal for small spaces 800mm, 1000mm	Larger installations with high cabling needs 1000mm, 1200mm
Width	Space-saving narrow and wide networking sizes. 600mm, 800mm	Space-saving narrow and wide networking sizes. 600mm, 800mm
Front Door	Perforated for higher density applications. Glass doors for closed rack requirements.	Perforated high airflow for higher density applications
Rear Door	Space saving split-doors on 800mm wide racks. Cost saving single doors on 600mm models.	Maximize white space capacity with split doors - standard on all models.
Aisle containment	Not designed for aisle containment	Industry-leading aisle containment solutions, innovative chimney designs as well.
Castors	Castors standard on all models for ease of placement	Robust casters available as standard or optional.
Load capacity Static / Dynamic	Solid, class-leading load capacity 800kg / 200kg (50kg / wheel)	Industry leading, heavy-duty load capacity 1500kg / 1000kg
